

General waste container/can

An information by the waste management company/kooperative of Pfaffenhofen/Ilm – february 2016

All not recyclable or reusable as well as dirty/soiled material is to be disposed of in the grey can. To find examples of such waste/material see backside.

All waste collected in this can is treated thermally in the incinerator of the Ingolstadt Cooperative of Mailing. The energy created by incineration will be used for district heating and electricity production.

Here are some tips how to proceed correctly:

- the grey waste container is emptied bi-weekly
- the date of waste collection is found in the collection schedule distributed annually at the end of the year during waste collection or on our homepage (www.awp-paf.de).
- At the day of collection, place the can at the side of the street by six o'clock a.m.
- Occasional excess waste which does not fit into the container may be placed next to the container in approved waste bags (available at Wertstoffhöfe, community town halls in the county or at the office of the waste management company, Scheyer Str. 76, Pfaffenhofen). There is a fee of € 5/bag.

For a fee, waste can be deposited directly at the “Deponie Eberstetten”, the facility of the incinerator at Mailing, or at private waste collection companies.
